**No. Bot/Add-on/1/22**

**Date: 03/08/2022**

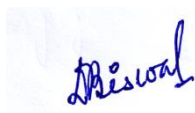

**NOTICE**

We are happy to announce that the Department of Botany, Government General Degree College at Mangalkote is going to start an **Add-on Course in “Ethnobotany and Medicinal Plants” from the current academic session (2022-23)** as a value added and skill enhancement programme following the recommendations of U.G.C. As of now, it has been decided to be compulsory for the students of **B.Sc. Zoology (Hons.) Sem III** who will be provided with a certificate from the college after successful completion of the course. We hope it will be an asset for them in the current job market as well as boost the portfolio of those aspiring for research. Furthermore, we have plans to develop the programme into a multidisciplinary mode to accommodate students from other streams in the near future. The course content, examination pattern along with its objectives and expected outcomes have been appended with this notice.
