

**GOVERNMENT GENERAL DEGREE COLLEGE,
MANGALKOTE**

REPORT

ON

GENERAL HEALTH AWARENESS AND SOCIETY

ORGANISED BY: NSS COMMITTEE & IQAC

DATE: 21.04.22

TIME: 12.30 pm onwards

VENUE: Seminar Hall, 2nd Floor

OBJECTIVE OF THE SEMINAR:

The seminar was aimed to make the students aware about the general health issues and the preventive measures to be taken to avoid them.

SPEAKER:

Dr. Amit Kumar Rakshit, Superintendent, Singot Rural Hospital

PROCEEDINGS OF THE SEMINAR:

Dr. Amit Kumar Rakshit began his deliberation by describing the concept of health and illness. He went ahead to describe how people often neglect tiny symptoms of underlying health issues which augments certain diseases silently. Some of these neglected conditions are often contagious and have the potential to affect an entire community threatening their existence. Then, he talked about the major reported health issues in and around Mangalkote and their seasonal prevalence. Of these, he mentioned several water-borne and food-borne diseases like diarrhoea, cholera, etc. He also gave a description of some common vector-borne diseases, mosquito-borne diseases (to be more specific), which are very common in the area. Dengue and malaria have high prevalence. He described the common symptoms of those diseases and the correct time to consult the doctor. Here, he also described about the different mosquito species and their biting habits (e.g. diurnal/nocturnal). Showing the pictures of those mosquito species (*Anopheles* sp., *Culex* sp., *Aedes* sp.) he described to the students about their identifying features and the precautionary measures to be taken to prevent infection and their transmission in the community. The resource person pointed out the reasons for the prevalence of those mosquito population by referring to the suitable breeding habitats available in and around the area of Mangalkote. Additionally, he described about some common skin diseases and how their negligence could lead to serious consequences.

In the second part of his lecture, he described about cancer and the common causes underlying them. Pointing towards oral cancer he described how tobacco consumption in various forms can lead to it. He showed some slides with pictorial descriptions of how serious the conditions can be that served as a warning signal to the students about the harmful effects of addiction to tobacco. He went on to describe women's health and the problems they face in general. He talked about menstrual hygiene and irregular periods and painful periods arising due to polycystic ovarian syndrome. He gave a description of some common physical exercises which can prevent the development of PCOS. Then, he described about cervical cancer, breast cancer

and ovarian cancer which are becoming more common among the female population around the world. The resource person described some simple methods of personal care and hygiene like pressing their own breasts while they take a bath to detect the presence of lumps if any. He stressed on the importance of pap smear tests and why should they be done periodically to prevent serious conditions being gone undetected. He also described some pregnancy related issues and the appropriate time for a woman to get pregnant.

In the third and last part of his talk, Dr. Amit Kumar Rakshit described about animal bites – dog bites, cat bites, rat bites, mole bites and snake bites which are also common among in Mangalkote. He described the venoms and their differences observed in these animals which special emphasis on snake venoms since poisonous snakes are rampant in the region. Showing several slides, he described how to differentiate between poisonous and non-poisonous snakes. He gave a brief record of the various snakes prevalent in and around Mangalkote. He went on to describe the process of rescuing a person suffering from snake bite and the dos and don'ts while giving the person first aid and carrying him/her to the hospital. Following those steps could increase the chances of survival of the person suffering from snake bite. Then, he described about anti-venoms and why identification of snakes is crucial for treatment of a person bitten by a snake. Finally, he described about rabies and other complications arising due to dog bite. He also illustrated a few health issues arising due to pets which are commonly observed among the population.

PARTICIPANT DETAILS:

NO. OF STUDENTS ATTENDED THE PROGRAMME: 30

OUTCOME OF THE PROGRAMME:

The students came to know about several health issues and their preventive measures. They also came to know about the health problems in the locality. Additionally, they came to know about animal bites and immediate care before taking them to hospitals.
